ABSTRACTED-PUB-NO: RU 2106875C

BASIC-ABSTRACT:

The range of medicinal application of biologically active balsamic preparations can be broadened by incorporating a toning component and a variety of plant oil extracts in the composition. The balsam, designated 'Fitaon-1.2'', is made up of the following ingredients (wt.%): (i) an aromatising component (0.5-20.0) comprising essential oil derived from mint, fir, coriander, anise, camphor, dill, cloves or fennel and containing a toning preparation (not more than 0.2% of base weight) comprising vanilla and/or oil extracted from filbert, chestnut, pine kernels, walnut, sea buckthorn and/or dog rose; oil extracts from everlastings, Leonorus, yarrow, celandine, thyme, Origanum, St. John's wort, peppermint, sage, dog rose fruit, coriander, caraway, horse chestnut, pine buds and calendula blossom (balance).

USE - The balsam has analgesic, anti-inflammatory, antimicrobial, regenerative and anti- exudative activity. It is useful in medicine, particularly urology, ENT, dermatology, stomatology, gynaecology, proctology and physiotherapy.

ADVANTAGE - The balsam has a wide range of therapeutic activities and produces no pronounced side-effects.
